**Thursday March 13, 2025**

Lunch at noon - Sale at 1:00

Dillon Livestock Auction • Dillon, MT

Cattle raised  
at 6,000 -  
9,000 feet in  
elevation

**UPDATED EPDS**

# LEADORE

## Angus Ranch

Since 1941

Dear Friends and Fellow Ranchers,

We are excited to extend a warm invitation to you for Leadore Angus's annual bull sale, taking place on March 13th, 2025 at the Dillon Livestock Yards in Dillon, MT.

Join us as we present our True range raised performance bulls that offer honest calving ease. These bulls are not only thick and balanced but also affordable, making them an excellent addition to your herd. Our bulls are specifically bred with maternal traits in mind, ensuring they live and produce efficiently on short feed - resulting in the most effective production.

Leadore Angus is a family-run ranch, with 2nd and 3rd generation family members involved in the day-to-day operations. We take pride in all aspects of the ranch and are dedicated to providing you with the best cattle.

Leadore Angus has been recognized by 2017 BEEF Magazine as one of the Top 100 Seedstock Producers in the US, a testament to our commitment to quality. Our sale will feature sons of great proven sires, backed by over 50 years of production sales. We stand behind our breeding program with a Breeding Guarantee.

We invite you to visit us on the range and see our cattle firsthand. Our bulls are available for viewing anytime, and we would love to share our passion and dedication with you.

We look forward to seeing you at the sale on March 13th and helping you find the perfect addition to your herd.

Warm regards,  
Leadore Angus

*Livestream • View • Bid • Buy*

Bulls must be picked up from Saleyard within 48 hours of purchase

Make checks payable to Dillon Livestock Auction

**MANAGEMENT PROGRAM**

Last year we calved about 850 cows. We handle the cows just like commercial cattle. Cows never eat anything but grass and hay. Replacement heifers are grown out on USFS range up Little Eight-mile Creek. All cows with heifer calves spend the summer on USFS range up Railroad Canyon between Leadore and Horse Prairie. Mature cows with bull calves spend the summer at 18 Mile creek on the Ox Bow Ranch above Leadore. Young cows with bull calves are pastured on wet meadows along the Lemhi River. We start feeding the young cows in mid-December. We feed the mature cows a partial feed of alfalfa hay as a protein supplement. The cows are comingled for calving, then separated into age groups again with their calves. None of the females on the ranch ever receive any grain — this is a grass deal.

**GENETIC PLAN**

Our focus at Leadore Angus is to develop cattle that are the Cowboy Kind. Our cows run in dry, rough country and if they don't hold up and perform in those conditions, they go down the road. Since 1941, our goals remain strong maternal traits, calving ease and growth. We want more, heavier calves walking on the truck in the fall. We select bulls that we feel have these qualities and the pedigrees to back it up.

**BREEDING GUARANTEE**

50% Coverage of Purchase Price for 60-Day Breeding Season

All bulls selling \$3,000 or more will be given 50% of the value of the injured bull, minus any salvage value, IN A FUTURE SALE OR TOWARD A REPLACEMENT BULL IF ONE IS AVAILABLE. All injured bulls must be diagnosed by a veterinarian. Please contact us as soon as possible should an injury occur and prior to the injured bull being sold for salvage. Those injuries include broken penis (ruptured penis), broken legs, stifle and disposition. Leadore Angus does not cover cuts, illness and items out of our control.

All claims must be made by September 1, 2025. This does not include death, mismanagement or neglect. Nor does it include injuries that occurred prior to breeding season if your bull is turned out with other bulls.

A copy of the sales receipt must be received by Leadore Angus to receive proper credit.

**BREEDING SOUNDNESS EXAM**

Lemhi Large Animal, Todd Tibbits, will examine each bull prior to the sale. Any bull not meeting the Society for Theriogenology standards will be culled. A copy of the Breeding Soundness exam will accompany the registration papers on each bull.

**HEALTH PROGRAM**

Our health program is aimed at prevention. We vaccinate at branding with 8-way Clostridium and modified live IBR-BVD-PI3-BRSV. We give the same vaccinations plus Pasturella a couple of weeks prior to weaning. The heifers get Bangs vaccinated after weaning. About a month before breeding, the yearling heifers get another shot of IBR-BVD-PI3-BRSV. On the day the bulls are examined for breeding soundness, they get 8-way Clostridium and IBR-BVD-PI3-BRSV. We also give a wart vaccine to the bulls to reduce the number of penile warts. This herd has been on a modified live BVD vaccination program for many years, that it is pointless to test for persistently infected BVD individuals. We tested a couple of times and have never found even one in the herd.

**PATHFINDER COWS**

Pathfinder Cows are the cows in the herd that always calve on time and raise a calf at least 5% heavier than the herd average. A cow has to raise three calves to qualify. Since this program started, we have bred more Pathfinder Cows and proven more Pathfinder Sires than any breeder in Idaho. We currently own 80 active Pathfinder Cows (three herds before 2016). Upward 307R, Hero 0616, and Alliance 431N are Pathfinders. In the Angus breed, less than 1% of cows are Pathfinders. In these herds, about 10% are Pathfinders. All Pathfinders will be marked with the pound (#) sign in their pedigrees in this sale book.

You can be sure that if a bull makes it to the sale on this outfit, he is fertile, healthy, functionally sound, and his performance data and EPDs are as accurate as we can make them.

# L EXPLANATION OF TERMS USED IN THIS SALE BOOK

## PERFORMANCE

### **BIRTH WEIGHT**

Actual weight of the calf within 24 hours of birth. Affected by calf sex, age of dam, feeding level, temperature during late fetal development and genetics.

### **WEAN WEIGHT**

Weight at weaning adjusted for days of age and age of dam

### **WEAN RATIO**

A within herd ranking of adjusted weaning weight. Calculated as the calf's adjusted weight divided by the average weight of the contemporary group within which he was raised to weaning. A ratio of 100 is always the average of the group.

### **YEAR WEIGHT**

Weight of yearling adjusted for days of age and age of dam.

### **YEAR RATIO**

A within herd comparison of all bulls tested based on their adjusted 365-day weight. A ratio of 100 is the average of the contemporary group.

### **COW PRODUCTION**

Reported as number of calves weaned and average WR and number of calves tested to YW and average YR. The current calf is included in average YR.

## EPDS (EXPECTED PROGENY DIFFERENCES)

### **EPDS ARE CURRENT AS OF 3/3/2025**

View current EPDs at [www.Angus.org](http://www.Angus.org)

### **CED (CALVING EASE DIRECT)**

This EPD is a direct expression of calving ease when the bull is bred to replacement heifers. In this case, the higher the number, the less calving difficulty. This measure is highly correlated with BW EPD.

*Breed average CED EPD for non-parent bulls is +6*

*Leadore's 2025 sale bull's CED EPD average is +7*

### **BW (BIRTH EPD)**

The weight in pounds that this bull should add or subtract from his calves at birth when compared to the average of all Angus bulls in use in 1979. BW EPD has been shown to be nine times as accurate as birth weight in predicting size of calves from a bull.

*Breed average BW EPD for non-parent bulls is +1.3*

*Leadore's 2025 sale bull's BW EPD average is +0.7*

### **WW (WEANING WEIGHT EPD)**

The weight in pounds that this bull should add to his calves at weaning when compared to the average of all Angus bulls in use in 1979.

*Breed average WW EPD for non-parent bulls is +67*

*Leadore's 2025 sale bull's WW EPD average is +61*

### **YW (YEARLING WEIGHT EPD)**

The weight in pounds that this bull should add to his calves at yearling when compared to the average of all Angus bulls in use in 1979.

*Breed average YW EPD for non-parent bulls is +117*

*Leadore's 2025 sale bull's YW EPD average is +108*

### **MILK (MILK EPD)**

The additional weight in pounds that should be produced by daughters of this bull when compared to the average of all Angus bulls in use in 1979

*Breed average Milk EPD for non-parent bulls is +26*

*Leadore's 2025 sale bull's Milk EPD average is +26*

### **\$W (WEANED CALF VALUE)**

Index value expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

*Breed average \$W for non-parent bulls is +61*

*Leadore's 2025 sale bull's \$W average is +61*

### **\$F (FEEDLOT VALUE)**

Index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires.

*Breed average \$F for non-parent bulls is +81*

*Leadore's 2025 sale bull's \$F average is +81*
